Education

M.S. in Computer Science, Stony Brook University (SBU) **Expected Graduation May 2018**

B.S. Magna Cum Laude in Computer Science with minor in Music Technology, Stony Brook University **Graduated May 2017**

GPA 3.81, Honors College, Computer Science Honors.

Smithtown High School East (SHSE) **Graduated June 2013**

GPA 4.03, National Honor Society, French Honor Society.

Experience

Software Engineer Intern at Applied Visions Inc. **January and May - August 2016, January 2017**

- Attended scrum and sprint meetings, and gave presentations on research and software to coworkers.
- Designed and developed tools for transforming and visualizing large datasets, and laid foundation for first version of visualization software.
- Perfect score on performance evaluation.

Part-Time Web Developer at Eduware Inc. **February 2014 - November 2015**

- Worked on the company's main application, Test Wizard (www.testwizard.com).
- Implemented new features, such as a new UI for a messaging system, and automated tasks previously done by hand, such as creating textbooks.

High School Teaching Assistant **January - June 2013**

- Assisted students with in-class assignments for Intro to Computer Science at Smithtown East.

Accompanist **2010, 2011, 2012**

- Accompanied soloists on piano for NYSSMA and All-State competitions.

Honors and Awards

- Presidential Scholarship and Dean's Scholarship from SBU.
- Link and A.B. Lawrence Scholarships for community service from First Presbyterian Church of Smithtown.
- Named as one of the Researchers of the Month for URECA, May 2017.
- Finalist in 2017 SBU Game Programming Competition.
- SBU-TV Film Festival - Undergraduate Winner 2014, Best in Show 2015.
- AP Scholar with Distinction.
- Computer Science Academic award from SHSE.
- Gold medal, Level 6 Piano, New York State Student Music Association (NYSSMA), 2010 – 2012.

Projects

Sonify – Thesis Project

Mobile sound design application where users place sound-emitting nodes and draw barriers in a virtual space.
Interface based around our natural intuition on sound, correlating visual variables with sonic ones.
Allows for an easier and more intuitive workflow for sound novices.

CryptoClash – Independent Project, Team of 3

Multiplayer game that is thematically centered around digital currency.
Acts as an educational tool on online market volatility as well as behavior in a competitive economic setting.
Acted as programmer, and worked with a project designer and a UI developer.

Hybrid Digital-Analog Synthesizer – Independent Study, Team of 2

A simple synthesizer, programmed on an Arduino with an LCD interface that allows manipulation of wave and envelope variables.
Acted as programmer and worked with an electrical engineer.

Image Quilting – Final Project for Computer Graphics course

An implementation of a pre-existing algorithm that efficiently generates and draws with textures.

Skills

Programming and Software

Building web pages with HTML, CSS, JavaScript, AngularJS, ASP.NET, and Flask.
Working with databases using SQL and MVC.
Version control with Git and TFS.
Building games in Unity, and JavaScript on the web.
Visualizing, manipulating, and analyzing datasets with D3JS and Python.
Other environments - Visual Studio, Xcode, Arduino.

Art and Music

Piano performance and composition.
Audio engineering, mixing, and production using Logic Pro.
Photography and videography.
Video editing using Final Cut Pro.
